

Vision: A coordinated regional health system which provides exceptional care, promotes healthy choices and supports resilient communities.

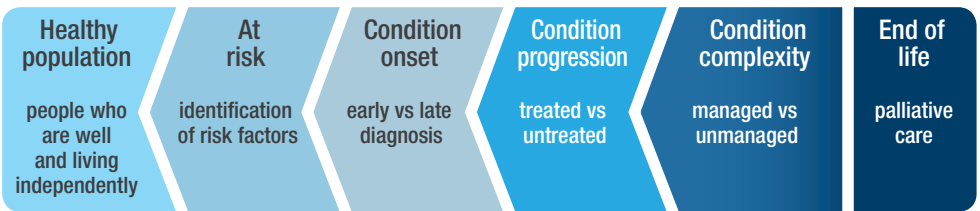

1. Inputs

2. Governance

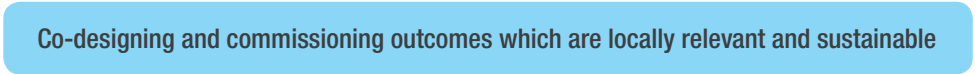

3. Population health strategy

4. Person-centred interventions

5. Place-based

6. Foundations for change

- Setting priorities
- Allocating resources
- Monitoring performance

Reducing future clinical and financial risk across the system

Designing activities to stop, slow, reverse, divert the flow of people across the continuum

Improving local health care

- Achieving four key results:
- improved health outcomes
 - better consumer experience
 - enhanced provider satisfaction
 - increased value for money
